PROJECTS

Nexusnews | *Html, CSS, React, News API, Git*

Nov 2023

- Developed Nexusnews, a web application that fetches news articles using the News API and displays them in a visually appealing manner
- Utilized CSS, HTML, and JavaScript to create an interactive and responsive user interface
- Implemented React framework for efficient component-based development
- Leveraged Git for version control and deployed the project on GitHub

Task Ticker | *HTML, CSS, JavaScript, React JS, Git*

August 2023

- Task Ticker features include CRUD operations for managing tasks (Create, Read, Update, Delete) and a task priority drop down .
- Implemented the functional website using React JS, HTML, CSS, and JS.
- Actively refined design and functionality through iterative improvements based on user feedback.
- Utilized Git for version control and deployed the project on GitHub.
